

[Dallas Plowden]

[Tropical Snake: Big Boss V. Big Kuma]

Introduction

I am Dallas Plowden and I am from
Stamford, I got into this program because
my friends had recommended me to join
since I had multiple programming courses in
school

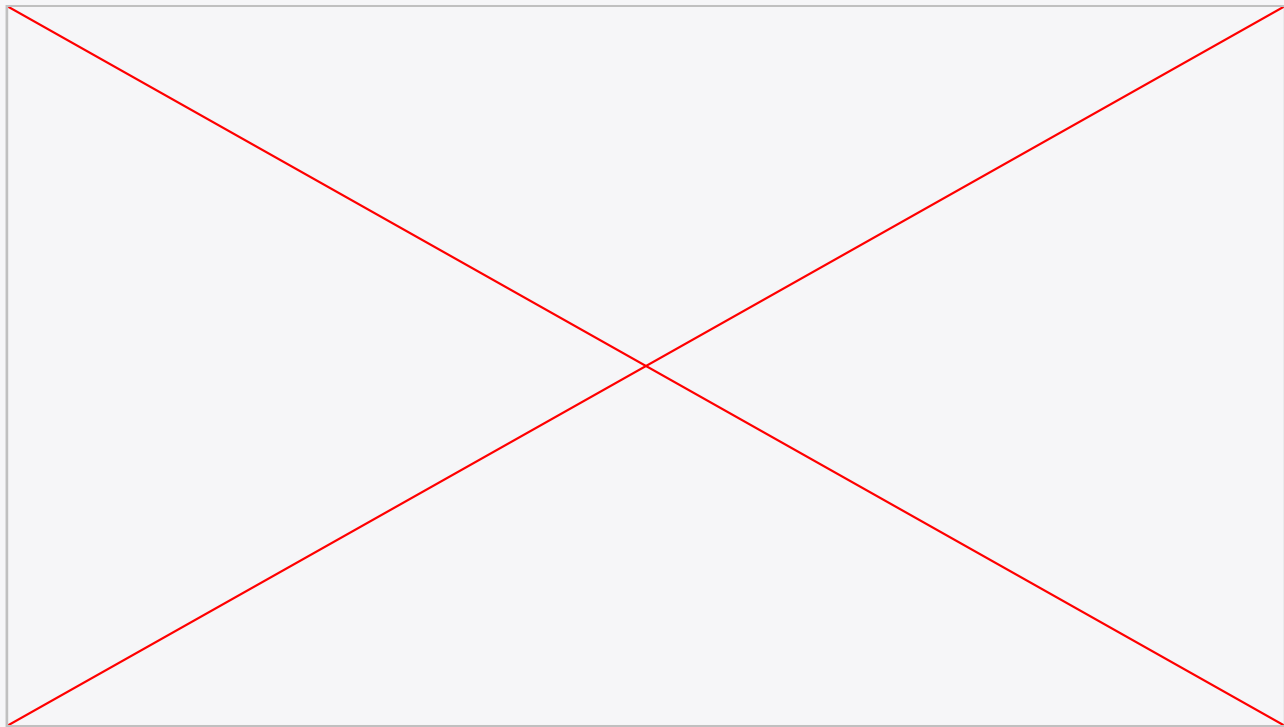

Core Concept

- **Describe your your level:**

The goal of the level is to kill all the NPC Monokuma's and collect every coin in the area as you go through the level, the differences from this and the original one is that the setting is now from a generic sky background to a tropical looking area, new blocks have been adding and a boss enemy is now in the center of the area. The new NPCs Monokuma are all around the area, they walk around trying to finally finish off Big Boss to complete their mission of spreading despair to the island

Gameplay

Possible Target Audience

**You can base the info of this slide according to the results of your playtesting sessions.*
